

## 10/19/2021 Opening Ceremony

On the first day of the training, all participants were gathered and the opening ceremony had held. Firstly, they watched the opening video from JICA Chugoku center, and the aim of this program was explained. Then, they had a brief introduction of participants and staff, and participants showed their expectations of this training and what they intend to learn through this program. They said they're expecting to learn strategies and systems in educations interactively with other participants from various countries. After the self-introductions, the specifics of the training over the next two months were explained. Also, explaining details and schedule, it was mentioned that one thing they need to remember is they need to put down the points of what they take in ,and share what they've learned from others. By doing so, they could be able to share them with their colleague after the training, and there might be some benefits as well in their home countries. Lastly, they learned how to use Google classroom effectively. It was insisted that trainees can contact with staffs whenever the difficulties happen.
