

JICA Closing Ceremony

November 25th, 2022

The closing ceremony started with an evaluation discussion in which all the participants shared their opinions and reflections about the course. Most participants stressed that the time was limited to a deeper discussion. However, the course objective was instead achieved.

Overall each student suggested the future enhancement of the program and what kind of reports students better acknowledge. A student pointed out that besides the training, there should be another interactive platform where the students get to know each other and exchange different countries, which facilitates the discussion on a practical level to become more sufficient.

Ms. Hirata started the opening ceremony after the evaluation session was done.

Professor Yoshida gave a word to the students about learning continuity and genuine advice about the practical use of this training.

JICA staff speech and passing the certificate to students.

Professor Yoshida greetings and passing the rest of the certificate.

An appreciation speech from Mr. Qais and Mr. Innusah.

At last, all the training participants that could attend the closing ceremony could take a memorial.
